

ABSTRACT

The present invention provides a method of treating sebaceous gland disorders comprising administering to a patient in need of said treatment an effective amount of a compound named [(2,4,6-triisopropyl-phenyl)-acetyl]-  
5 sulfamic acid 2,6-diisopropyl-phenyl ester or a pharmaceutically acceptable salt thereof. Particularly, methods of treating sebaceous gland disorders are provided wherein said disorders are selected from seborrhea, acnes, perioral dermatitis, rosacea, and corticosteroid-induced acneiform lesions. The present invention provides methods of treating acnes such as, for example, chloracne, ciliaris acne,  
10 cystic acne, keratosa acne, vulgaris acne, senile acne, and medicinal acne.
